6 September 1967

MEMORANDUM FOR THE RECORD

SUBJECT: DDI Briefing on R&D Coordination

1. A general scheme for Agency R&D coordination was discussed with E. Proctor, [redacted] of DDI. Again, [redacted] of PPB attended the meeting also.

2. Ed Proctor had no problems with the proposed procedure and felt that the number of secondary effects might prove to be very useful; [redacted] is personally anxious to see some sort of feedback on results from the R&D program incorporated into the overall procedures; [redacted] asked a number of questions pertaining to procedural detail.

3. Proctor raised the question of how firm the R&D program categories were, and discussed a possible need for having Production as a subcategory separate from Processing. It was not clear as to whether he was referring to the R&D subcategories or the overall Agency program structure in which case Production and Processing could each be program categories -- PPB will work this out.
